Initial response Info

You can provide messages to acknowledge the user's initial request. You can also configure next step in the conversation and branch based on conditions.

▼ Response to acknowledge the user's request
Message: Okay Welcome to Aditya's Online Shopping Portal

▼ Message group Info

You can define a text message group to respond using plain text.

Message - optional
Okay Welcome to Aditya's Online Shopping Portal

► Variations - optional

Advanced options

Configure user request acknowledgement response, dialog code hook and conditional branches.

▼ Slots (13) - optional Info

Information that a bot needs to fulfill the intent. The bot prompts for slots required for intent fulfillment in priority order below.

Add slot

The screenshot shows the AWS Lambda console interface for managing a Lambda function named "Acmegrade Cloud Computing". The function is configured with the following details:

- Function name:** acmegrade-cloud-computing
- Description:** Cloud Function for Lambda
- Runtime:** Node.js 18.x
- Memory:** 128 MB
- Timeout:** 5 seconds
- Tracing:** Off
- Deployment package:** ZIP file (1.17 KB)
- Environment:** No environment variables are defined.
- Logs:** CloudWatch Logs (Stream: acmegrade-cloud-computing)
- Metrics:** CloudWatch Metrics (Metric: acmegrade-cloud-computing)
- Logs configuration:** CloudWatch Metrics (Metric: acmegrade-cloud-computing)
- Code signing:** Enabled
- Layer versions:** No layers are attached.

The Lambda function is triggered by CloudWatch Metrics and CloudWatch Metrics Insights. It has a version labeled "DRAFT" and a revision labeled "1".

The screenshot shows the Amazon Lex console interface. At the top, there's a navigation bar with the AWS logo, services dropdown, search bar, and account information for Singapore and aj1674067@gmail.com. Below the header, the main area displays the 'Amazon Lex' interface. On the left, a sidebar lists intents: 'Back to intents list (2)', 'Search' (with a placeholder), and 'Sort by last updated'. Under the 'OnlineShopping' intent, 'FallbackIntent' is listed. The main content area shows the 'Draft version' of the 'OnlineShopping' intent. It includes tabs for 'Editor' (which is selected), 'Visual builder', and 'New'. The 'Code hooks - optional' section is expanded, containing a checkbox for 'Use a Lambda function for initialization and validation' and a descriptive note about dialog code hook invocation. Above this section, status indicators show 'English (US)' and 'Successfully built'. To the right, a 'Test' panel titled 'Test Draft version' shows a recent build submission. It features a 'Run' button and an 'Inspect' tab. A conversation log is displayed with messages from a user ('Dear Yash, Please provide the street name for delivering the product?' and 'Mumbai Pune Expressway') and an AI response ('Dear Yash, Please provide your city pincode?'). A green checkmark at the bottom right of the test panel indicates 'Ready for complete testing'. A text input field with a microphone icon and the placeholder 'Type a message' is also present. At the very bottom, there are 'Save intent' and other navigation buttons.
